

Hello FCC,

Enough time for me that Our deaf people are not satisfied about VRS system making so long waiting.. I want any relays join to serve for deaf calling and better service...

Most deaf people are not happy that DLink is not making upgrade for missing id caller or redail or no ringing sign because we can't hear ring sound... we keep to watch dailing until end of ringing... We want dlink makes upgrade for dlink and sorensen already has missing id caller and ringing sign and redail... that why we hope dlink and sorensen will be matching then no plms for as long years...Thanks Andrew
